COVID-19 EXPOSURE, TESTING & ISOLATION FLOWCHART

EFFECTIVE JULY 2021

Have you been exposed/considered a close contact to a positive case?

- **YES AND I AM VACCINATED**
  - Gannon Test: You will receive a phone call confirming your positive test results. Isolate immediately. Gannon Health Center will provide basic instruction, collect information and schedule a confirmation test with UPMC.
  - Gannon’s contact tracing and care teams will call you to collect close contact information, coordinate your move to isolation if required and assist with food, laundry and medication supply as needed.
  - Gannon’s Care Team will check in with you throughout isolation. Health Center will contact you in advance of your release date to inquire about symptoms and provide release instructions. Isolation will occur after a positive test result. Length of time and release date will be determined by the Health Center.
  - *Recovery defined as: no fever without the use of fever reducing medications AND improvement in respiratory symptoms (cough, shortness of breath)
  - Gannon Health Center must approve return to campus.

- **YES AND I AM UNVACCINATED**
  - Gannon Test: You will receive a phone call confirming your positive test results. Isolate immediately. Gannon Health Center will provide basic instruction, collect information and schedule a confirmation test with UPMC.
  - Gannon’s contact tracing team will call you to collect close contact information. You will isolate at home.
  - Gannon Health Center will contact you in advance of your release date to inquire about symptoms and provide release instructions. Isolation will occur after a positive test result. Length of time and release date will be determined by the Health Center.
  - *Recovery defined as: no fever without the use of fever reducing medications AND improvement in respiratory symptoms (cough, shortness of breath)

- **NO**
